

# BETTER TOGETHER

ALL ALASKA PEDIATRIC PARTNERSHIP : 2014 ANNUAL REPORT

# growing a healthy community

ALL ALASKA

PEDIATRIC  
PARTNERSHIP

We advance child health priorities through innovative partnerships and cross-agency collaboration by working to increase communication, expand education and training opportunities.

United, the talented leaders in Pediatric care for Alaska drive change and ensure the highest quality of healthcare for Alaska's children and families.

# TRIPLE P HELP ME GROW

Secured grant funds to launch to these special projects statewide.

## STATEWIDE COMMUNITY FORUMS

Hosted 7 Community Forums where we educated community members about the effects of Adverse Childhood Experiences and the need to mitigate toxic stress and promote resiliency  
(Communities: Juneau, Mat-Su, Fairbanks, Homer, Bethel, Dillingham, and Sitka)

The "1000 Days" Campaign facilitated by A2P2 has brought a variety of community partners together to focus on helping children get off to a positive start... Due to the efforts of A2P2, the conversation around ACES and targeted intervention has greatly expanded and serves to bring stakeholders who often work independently together to work collectively... Additionally, A2P2 is working with partners to bring two evidence based practices to the state- Help Me Grow and Triple P. These programs provide real strategies for improving services to young children and their families.

~ SHIRLEY PITZ, ECCS PROGRAM

## PARTNER MEETINGS

X Monthly partner meetings around the state. Why?

## RESILIENCY DAY

Open to the public, Resiliency Day featured national experts on the long term economic impact of ACE's, toxic stress and resiliency.

Concieved, Launched & **SOLD OUT!**

# ALL ALASKA PEDIATRIC SYMPOSIUM

With over 17 Speakers and X national experts on ACE's, toxic stress and resiliency, we provided over 15 hours of of CME to Alaskan pediatric providers.

The Symposium sold out with an increase in attendance of X percent.

It takes a village to raise a child and A2P2 has embraced this philosophy wholeheartedly. A2P2 has strengthened our medical community by increasing physicians' and hospitals' knowledge of child and family health. As a community leader, they have supported programs that reduce trauma and build resiliency. With A2P2's help, we will continue to ensure all Alaska children grow up in a safe, stable and nurturing environment.
